Delivered Date: 05/03/2011 03:40 PM EDT

Subject: RE: Fayetteville

There are two UIC disposal wells that have been shut-in for a few months now in response to requests from the state geologic survey and AOGC. Agencies continue to collect data as the seismic events have continued.

If I recall correctly, the AR Survey and AOGC have both made statements to the effect that HF has not been linked, tentatively or otherwise, to the seismic events.

If you need more details, will have to ask around w/in CHK.

Subject: Fayetteville

John

What do you know about the seismic activity there lately? Did they have a moratorium on UIC injections or on hydraulic fracturing?
